

Astronomy / target observing log

Use one sheet per target. Label the time basis and record the date with each entry if the session crosses midnight.

Target / reference	Observer / location	Session date	Time basis: local / UTC
WHAT I SAW / SKETCH OR IMAGE REFERENCE		SESSION SETUP Instrument: _____ Eyepiece / magnification: _____ Filter, if used: _____ Cloud / sky brightness: _____ Image steadiness: _____ Sketch orientation / scale: _____	
Observations			
Date / time	Equipment change, if any	Visible detail / observation	
Next time I want to check		Photo / sketch file reference
